## Research Interests

I am broadly interested in the field of Deep Learning. My current research interest lies in the intersection between Computer Vision and Natural Language Processing (*i.e.*, vision-language). My research goal is to build multi-modal AI systems that can be used in real-world applications (*e.g.*, e-commerce platform). My expertise includes but is not limited to vision-language pre-training and (parameter-efficient) adaptation, many vision-language tasks (*e.g.*, cross-modal retrieval, text-guided image retrieval, image captioning, text-based/guided image generation/editing), and some specific tasks (*e.g.*, person ReID).
